# VRAJ PRAJAPATI

+91-9870098351 vrajprajapati6004@gmail.com linkedin/VrajPrajapati github/VrajPrajapati6

## Education

**Nirma University** **2024 - Present**
*B.Tech in CSE - CGPA:* ***9.42/10*** *Ahmedabad, Gujarat*

**Vishwa Vidhyalaya** **2023 - 2024**
*GHSEB Board : 288/300, GUJCET: 108/120, Percentile: 98.87* *Ahmedabad, Gujarat*

## Technical Skills

**Languages:** C, C++, Java, JavaScript, Python, SQL
**Developer Tools:** VS Code, Git, GitHub, Postman, MATLAB
**Frameworks:** Node.js, Express.js
**Databases:** MongoDB, PostgreSQL
**Coursework:** DSA, OOP, DBMS, AI and ML, Operating Systems
**Areas of Interest:** Backend Development, Generative AI, Competitive Programming

## Experience

**Computer Society of India, Nirma University** **Jan 2026 - Present**
*Executive Member and Software Developer* *Ahmedabad, India*

- Developed a real-time contest analytics platform using **Codeforces API**, supporting **700+ users** and **300+ concurrent participants** with dynamic leaderboard updates under 200 ms.
- Engineered backend systems with **custom scoring logic** for division-wise contests, enabling real-time performance tracking across multiple cohorts.
- Built a secure membership platform with **payment gateway** and **admin dashboard**, onboarding **500+ users** and automating verification workflows.
- Implemented authentication and profile management system integrating **Codeforces IDs**, enabling centralized tracking of user participation and performance across CSI events.

## Projects

**Market Mapper - AI-Powered B2B Intelligence Platform** | *Node.js, MongoDB* **GitHub**

- Designed a data-driven business feasibility platform leveraging Google Maps and Places APIs, analyzing **1K+ locations** to identify market gaps and competition density.
- Enhanced decision-making capabilities by integrating **Gemini AI** to generate feasibility scores and actionable recommendations.
- Expanded platform functionality by enabling **B2B collaboration** with real-time messaging and secure digital contract workflows.

**Smart Crop AI** | *Python* **GitHub**

- Built an AI-driven crop advisory system utilizing CNN and Random Forest models trained on a **12GB dataset**, achieving more than **90% accuracy**.
- Strengthened prediction accuracy by incorporating **Open Weather Map API** and real-time environmental data for weather-aware recommendations.
- Streamlined backend processing through **Flask-based APIs**, enabling efficient model inference and scalable data handling.

## Achievements

- **Codeforces**: **Pupil**, Max contest rating **1361**.
- **LeetCode**: **Knight** Max contest rating **1863**.
- Solved more than **1100 DSA and CP problems** across various coding platforms.
- **Winner** of Competitive Programming League (CPL 2025).
- **Finalist** in Tech Sprint Hackathon organized by **Google Developer Groups**.
- Recipient of **Nirma Merit cum Scholarship** for academic excellence.
