Education

Nirma University **2024 - 2028**
B.Tech in CSE - CGPA: ***9.42/10*** *Ahmedabad, Gujarat*

Technical Skills

Languages: C++, Java, JavaScript, C, Python, SQL
Backend: Node.js, Express.js, REST APIs, Authentication, API Design
Databases: MongoDB, PostgreSQL
Coursework: Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Artificial Intelligence and Machine Learning
Tools: Git, GitHub, Postman, Linux

Experience

Computer Society of India, Nirma University **Jan 2026 - Present**
Executive Member *Ahmedabad, India*

- Developed a real-time contest analytics platform using **Codeforces API**, supporting **700+ users** and **300+ concurrent participants** with dynamic leaderboard updates under 200 ms.
- Engineered backend systems with **custom scoring logic** for division-wise contests, automating leaderboard generation across **7+ divisions** and enabling real-time performance tracking across multiple cohorts.
- Built a secure membership platform with **payment gateway** and **admin dashboard**, onboarding **500+ users** and automating verification workflows.
- Implemented an **authentication and profile management system** integrating **500+ Codeforces IDs**, enabling centralized tracking of participation and performance across multiple CSI contests.

Projects

Market Mapper - AI-Powered B2B Intelligence Platform | *Node.js, MongoDB* **GitHub**

- Built a **business feasibility platform** that helps users evaluate their target location by analyzing **1000+ nearby business records** to identify competitor density, market gaps, and customer demand using **Google Maps and Places APIs**.
- Enhanced decision-making capabilities by integrating **Gemini AI** to generate feasibility scores and actionable recommendations.
- Expanded platform functionality by enabling **B2B collaboration** with real-time messaging and secure digital contract workflows.

Smart Crop AI | *Python* **GitHub**

- Built an **AI-driven crop advisory system** that recommends suitable crops, fertilizers, and detects plant diseases by analyzing soil and plant data using **CNN** and **Random Forest** models trained on a **12GB dataset**, achieving over **90% accuracy**.
- Improved recommendation reliability by integrating the **OpenWeatherMap API** with real-time environmental data for weather-aware crop suggestions.
- Developed **Flask-based APIs** for scalable model inference, enabling efficient backend processing and seamless advisory delivery.

Achievements

- **Codeforces**: **Pupil**, maximum contest rating **1361**. **Link**
- **LeetCode**: **Knight**, maximum contest rating **1863**. **Link**
- Solved over **1100+** DSA and competitive programming problems across various coding platforms.
- **Winner** of Competitive Programming League (CPL 2025).
- **Finalist** in Tech Sprint Hackathon organized by **Google Developer Groups**.
- Awarded the **Nirma Merit Scholarship** for academic excellence.
